Closing Manifesto

WELCOME TO THE AI MULTIPLICATION SYSTEM

Welcome to what might be the most immediately actionable session you'll attend all year.

Here's why this matters RIGHT NOW: The real estate landscape is splitting into two camps. Those who strategically stack AI models are analyzing 10x more deals, creating content in 15 minutes that used to take 3 hours, and identifying motivated sellers 12 months before competitors even know they exist. Those who don't? They're watching their market share erode while wondering why top producers seem to have unlimited capacity.

The brutal truth: A luxury brokerage in Portugal closed $100 million in sales using the AI Multiplication System. A residential team went from $17,800 in ad spend to $126,500 in GCI—an 8x return. Commercial investors reduced underwriting time by 98% and now evaluate 10x more deals per week. These aren't "imagine if" scenarios. They're documented results from professionals who learned what you're about to master.

What you'll achieve by the end of this session:

- Deploy the Triple Stack framework ($60/month delivering 2-8x ROI)
- Master the 15-minute content multiplication workflow
- Implement AI-powered list stacking for motivated seller identification
- Walk away with 15+ copy-paste prompts for immediate use
- Build your 90-day implementation roadmap with measurable milestones

This workbook contains everything you need: teaching content that explains WHY each system works, copy-paste prompts you can use TODAY, worksheets for implementation planning, and tracking systems to measure your ROI.

Here's my challenge to you: Don't just take notes. Fill in the worksheets. Commit to your 30-day action plan. Share your accountability partner's name. The 10% who implement change everything. The 90% who don't stay exactly where they are.

Let's build your competitive advantage.

To Your AI Multiplication Mastery,
Edmund Bogen & Team

PRE-SESSION ASSESSMENT

Current State: Where Are You Now?

Rate yourself honestly (1-10) on each dimension:

AI Knowledge & Usage

_____ I understand the strengths/weaknesses of different AI models

_____ I use AI strategically (right tool for right task) vs. randomly

_____ I have copy-paste prompts that deliver consistent results

Content Creation Efficiency

_____ I create social media content quickly (under 30 min per platform)

_____ I repurpose one piece of content across multiple platforms

_____ My content maintains consistent quality without burning me out

Lead Generation & Analysis

_____ I have systematic list stacking strategies (not random filters)

_____ I can analyze 10+ deals per week without getting overwhelmed

_____ I identify motivated sellers before they hit MLS

TOTAL SCORE: _____ / 90

If your score is below 60: This session is CRITICAL for you—you're leaving massive efficiency gains and competitive advantages on the table.

If your score is 60-75: You're aware of the opportunity but haven't systematized it yet. This session turns awareness into implementation.

If your score is above 75: You're ahead of most—this session will refine your workflows and introduce advanced stacking strategies you haven't considered.

Where Do You Want to Be?

My biggest AI challenge right now:

_____

_____

What I want to achieve in the next 30 days:

_____

_____

How I'll measure success:

_____

SYSTEM 1: THE TRIPLE STACK REVENUE ENGINE

The $60/Month Multi-Model Framework Delivering 2-8x ROI

What This Means for Your Bank Account:

- Save 20-30 hours monthly on content creation alone
- Produce higher-quality output than single-model approaches
- Deploy AI that handles research, analysis, AND creative in coordinated workflows
- Total investment: $60/month (ChatGPT Plus + Claude Pro + Perplexity Pro)

The Technology Behind Your Triple Stack

The breakthrough isn't using AI—it's using the RIGHT AI for each specific task. Most agents waste hours asking ChatGPT for market research (when Perplexity has real-time web data with citations), or expecting one tool to excel at everything.

Strategic Routing is Your Competitive Moat:

AI MODEL	BEST FOR	REAL ESTATE USES
Perplexity Pro ($20/month)	Research with real-time web access and 40+ citations per report	Market data, competitive analysis, trend research, property comparables, neighborhood insights
Claude Pro ($20/month)	Analysis, long-form writing, following complex instructions	Listing descriptions, market reports, email sequences, client communications, detailed analysis
ChatGPT Plus ($20/month)	Creative variations, brainstorming, image generation (DALL-E)	Social media posts, headline testing, visual content, creative alternatives, property marketing ideas

Why This Changes Everything

Single-model users get frustrated because they're using the wrong tool for the task. Strategic stackers route intelligently and get:

- **Better results** — Each AI does what it's actually best at
- **Faster execution** — No wasted time on wrong-tool attempts
- **Lower costs** — $60/month total vs. expensive single solutions or outsourcing
- **Competitive moat** — 12-18 month advantage before competitors figure this out

TRIPLE STACK: PROFIT-GENERATING PROMPTS

Copy these exact prompts into the specified AI for immediate results:

PROMPT 1: Market Research Report (USE PERPLEXITY)

```
"Research the current real estate market for [CITY/NEIGHBORHOOD]. I need:
1) Average sale prices and days on market for last 90 days
2) Inventory levels and month-over-month trends
3) Key factors affecting the market (interest rates, local economy, new developments)
4) Competitive analysis - what other agents are doing
5) Opportunities for buyers and sellers right now

Provide citations for all data points. Format as an executive summary I can use with
clients."
```

PROMPT 2: Premium Listing Description (USE CLAUDE)

```
"You are an expert luxury real estate copywriter. Create a compelling listing description
for:

Property Type: [e.g., Single Family, Condo, Waterfront]
Price: $[AMOUNT]
Beds/Baths: [e.g., 4BR/3.5BA]
Square Footage: [e.g., 3,200 SF]
Key Features: [e.g., waterfront, renovated kitchen, pool, impact windows]
Neighborhood: [NAME]
Ideal Buyer: [e.g., young professionals, families, retirees]

Write 200-250 words emphasizing lifestyle over features. Use sophisticated but accessible
language. Focus on emotional benefits and the life buyers will live in this home. Include
a compelling opening hook."
```

PROMPT 3: Comparative Market Analysis (USE CLAUDE)

```
"Analyze these comparable properties and create a narrative CMA report:

Subject Property: [ADDRESS, SPECS]
Comparable 1: [ADDRESS, SPECS, SALE PRICE, DATE]
Comparable 2: [ADDRESS, SPECS, SALE PRICE, DATE]
Comparable 3: [ADDRESS, SPECS, SALE PRICE, DATE]

Create a report that:
1) Explains why each comp was selected
2) Analyzes adjustments for differences
3) Explains current market conditions
4) Provides pricing recommendation with reasoning
5) Includes market trend context
```

```
Write for a seller client - professional but accessible. 300-400 words."
```

PROMPT 4: Social Media Creative Variations (USE CHATGPT)

```
"I have this listing description: [PASTE LISTING TEXT]

Create 3 different headline variations for:
1. Instagram (attention-grabbing, emoji-enhanced)
2. Facebook (conversational, question-based)
3. LinkedIn (professional, market-insight angle)

Each should feel native to the platform and drive engagement."
```

PROMPT 5: Client Email Sequences (USE CLAUDE)

```
"Create a 5-email drip sequence for new buyer leads:

Target buyer profile: [DESCRIBE IDEAL CLIENT]
Price range: $[RANGE]
Geographic focus: [AREA]
My unique value proposition: [WHAT SETS YOU APART]

For each email, provide:
- Subject line
- Email body (200-300 words)
- Call-to-action
- Send timing (Day 1, Day 3, Day 7, Day 14, Day 30)

Tone: Professional but warm, building trust and demonstrating expertise."
```

MY TRIPLE STACK ACTION PLAN

Specific tasks I can route to the right AI:

1. _____

2. _____

3. _____

Estimated monthly time savings: _____ hours

Dollar value of time saved (hours × $150/hour): $_____

Monthly AI investment: $60 (ChatGPT + Claude + Perplexity)

Net monthly ROI: $_____ (savings minus $60)

First 3 triple-stack workflows I'll deploy this week:

- ☐ _____
- ☐ _____
- ☐ _____

Questions for Q&A:

_____

_____

_____

> 💡 **Pro Tip: Start Small, Prove Value**
>
> Don't try to implement everything at once. Choose ONE workflow this week (e.g., listing descriptions with Claude). Master it. Measure the time savings. THEN add the next workflow. Build momentum through quick wins.

SYSTEM 2: THE CONTENT MULTIPLICATION SYSTEM

The 15-Minute Multi-Platform Workflow

What This Means for Your Bank Account:

- Turn one listing into 5 platform-optimized posts in 15 minutes (vs. 2-3 hours manually)
- Maintain consistent social media presence without the time drain
- Multiply your content output 5-10x with same effort
- Free up hours weekly for high-value client relationship work

The 15-Minute Workflow (Step-by-Step)

TIME	STEP	WHAT YOU'RE DOING
0-5 min	Source Content Creation	Create ONE comprehensive piece using Claude (listing description, market update, success story)
5-8 min	Platform Transformation	Feed source content to Claude for platform-specific transformation prompts
8-12 min	Creative Variations	Feed Claude outputs to ChatGPT for headlines, hashtags, and creative alternatives
12-15 min	Review & Schedule	Quick review for voice/accuracy, schedule across platforms

Why Content Multiplication is the 2026 Standard

OLD WAY: Write unique post for each platform → 2-3 hours total → Inconsistent posting → Content feels generic

MULTIPLICATION APPROACH: Create once, transform strategically → 15 minutes total → Consistent presence → Platform-native optimization

Real Result: One realtor using this system saves 20-30 hours monthly on content while actually posting MORE consistently and getting BETTER engagement than manual creation.

The Compounding Advantage

Content multiplication creates benefits that compound over time:

- **Consistent presence** = top-of-mind awareness when leads are ready
- **Platform optimization** = higher engagement rates vs. copy-paste approach
- **Time savings** = ability to create MORE campaigns, not just keep up

- **Multi-platform strategy** = reaching different audience segments effectively

CONTENT MULTIPLICATION: PROFIT-GENERATING PROMPTS

PROMPT 6: Source Content Creation (USE CLAUDE)

```
"Create a comprehensive property spotlight for:

Address: [FULL ADDRESS]
Price: $[AMOUNT]
Type: [e.g., Waterfront Estate, Modern Condo, Family Home]
Key Features: [List 5-7 standout features]
Neighborhood Highlights: [What makes this location special]
Ideal Buyer Profile: [Who would love this home and why]

Write a 300-word spotlight covering: lifestyle benefits, property highlights,
neighborhood context, and investment value. This will be the source content I'll
transform for multiple platforms."
```

PROMPT 7: Instagram Transformation (USE CHATGPT)

```
"Transform this property description into Instagram content:
[PASTE SOURCE CONTENT FROM CLAUDE]

Create:
1. Main caption (125-150 words) - engaging, emoji-enhanced, with hook
2. Call-to-action that drives DMs or link clicks
3. 5-7 strategic hashtags (mix of popular and niche)
4. Suggested image carousel sequence (what photos to include 1-5)
5. Story follow-up idea to drive engagement

Make it feel native to Instagram - visual, aspirational, engaging."
```

PROMPT 8: LinkedIn Professional Post (USE CLAUDE)

```
"Transform this property information into a LinkedIn post positioning me as a market
expert:
[PASTE SOURCE CONTENT]

Create a 200-250 word post that:
- Leads with market insight or trend observation
- Uses this property as a case study/example
- Demonstrates my expertise and market knowledge
- Includes professional call-to-action
- Maintains LinkedIn's professional tone

Focus on education and expertise, not just 'buy this house.'"
```

PROMPT 9: Facebook Community Engagement (USE CHATGPT)

```
"Turn this property spotlight into a Facebook post optimized for engagement:
[PASTE SOURCE CONTENT]

Create:
- Conversational opening (2-3 sentences) with a question
- Key highlights in easily scannable format
- Community connection (mention neighborhood, local features)
- Engagement driver (question, poll idea, or call for comments)
- Natural call-to-action

Write like you're talking to neighbors, not broadcasting. Aim for comments and shares."
```

PROMPT 10: Short-Form Video Script (USE CHATGPT)

```
"Create a 30-45 second video script (TikTok/YouTube Short/Reel) for this property:
[PASTE SOURCE CONTENT]

Provide:
- Hook (first 3 seconds - must stop scroll)
- 3-4 key talking points (what to say on camera)
- Visual cues (what to show when)
- Call-to-action (what viewer should do)
- Text overlay suggestions

Format as: 'SAY: [what I say]' and 'SHOW: [what's on screen]'"
```

MY CONTENT MULTIPLICATION ACTION PLAN

Listings/content I can multiply this week:

1. _____

2. _____

3. _____

Platforms I'm currently neglecting that I can now activate:

_____

_____

Current time spent on social media content: _____ hours/week

Target time with multiplication system: _____ hours/week

Hours saved weekly: _____ (at $150/hour = $_____ /week value)

First piece of content I'll multiply using this system:

_____

_____

My 5-platform distribution plan:

- ☐ Instagram: _____
- ☐ Facebook: _____
- ☐ LinkedIn: _____
- ☐ Twitter/X: _____
- ☐ TikTok/YouTube Shorts: _____

SYSTEM 3: THE LIST STACKING INTELLIGENCE SYSTEM

AI-Powered Multi-Signal Motivated Seller Identification

What This Means for Your Bank Account:

- Identify motivated sellers 12 months before they hit MLS
- Contact prospects with 3-4x higher motivation than single-filter lists
- Stop cold-calling random lists—target AI-identified opportunities
- Build pipeline of pre-market deals competitors never see

The Multi-Signal Stacking Strategy

Single-filter lists (just "high equity" or just "absentee owner") are what everyone else runs. Multi-signal stacking combines PropStream AI predictions with layered criteria to find sellers BEFORE they're ready to list:

SIGNAL COMBINATION	WHY IT INDICATES MOTIVATION	TYPICAL TIMELINE
High Equity + Pre-Foreclosure	Financial distress despite property value—likely needs quick sale	3-6 months to listing
Absentee Owner + Code Violations	Out-of-state landlord with property management issues	6-12 months
Inherited + Vacant + High Equity	Estate settlement, property sitting empty, family wants liquidity	3-9 months
Long Ownership (20+ yrs) + Life Event Triggers	Downsizing, retirement, health changes	6-18 months

Why List Stacking Creates 12-Month Advantages

Traditional approach: Call everyone on single-filter list → 1-2% contact-to-contract → Competing with 10 other agents → Generic scripts

AI-stacked approach: Target multi-signal combinations → 3-4x higher conversion → Early relationship building → AI-informed personalized outreach

Real Result: Commercial investors using AI-stacked lists reduced analysis time 98% and increased deal evaluation capacity 10x. More deals analyzed = more opportunities found.

LIST STACKING: PROFIT-GENERATING PROMPTS

PROMPT 11: Multi-Signal List Strategy (USE CLAUDE)

```
"I'm building a motivated seller list for [CITY/AREA]. Help me design a multi-signal
targeting strategy.

My market focus: [e.g., Single family homes $300K-600K, Distressed properties, Inherited
homes]

Create 5 different multi-signal combinations I should run in PropStream, such as:
- High equity + absentee owner + property age
- Pre-foreclosure + code violations + equity position
- Inherited property + vacant + specific zip codes

For each combination, explain:
1) Why these signals together indicate motivation
2) Typical timeline to transaction
3) Best outreach approach for this seller type
4) Estimated motivation level (1-10)"
```

PROMPT 12: Property Research Deep Dive (USE PERPLEXITY)

```
"Research this property and owner situation to inform my outreach strategy:

Property Address: [FULL ADDRESS]
Owner Name: [IF KNOWN]
Signals: [e.g., Absentee owner, high equity, pre-foreclosure, code violation]

Find:
1) Recent news about the neighborhood (development, market trends)
2) Property value trends in this area (last 2 years)
3) Any public records about the property or owner
4) Recent sales of similar properties nearby
5) Factors that might motivate this seller

Provide citations for all information found."
```

PROMPT 13: Personalized Outreach Letter (USE CLAUDE)

```
"Write a personalized outreach letter to a potential motivated seller:

Property: [ADDRESS]
Owner Situation: [e.g., Inherited property, absentee owner, high equity, vacant]
Motivation Signals: [What PropStream/research revealed]
My Value Proposition: [How I can help - fast close, handle repairs, etc.]

Create a 1-page letter that:
```

```
- Opens with neighborhood/property-specific observation (not generic)
- Acknowledges their specific situation tactfully
- Presents my solution clearly
- Includes soft call-to-action (not pushy)
- Feels personal, not mass-mailed

Tone: Helpful and professional, not salesy."
```

PROMPT 14: Phone Script for AI-Identified Leads (USE CLAUDE)

```
"Create a phone script for calling a motivated seller prospect:

Lead Source: PropStream multi-signal list
Signals: [e.g., High equity + absentee owner + long ownership]
Property Type: [e.g., Single family home]
Situation: [What we know or suspect about their motivation]

Provide:
- Opening (first 10 seconds - purpose of call)
- Qualification questions (identify true motivation)
- Value proposition (how I can help)
- Objection handling for common responses
- Next step/close

Keep it conversational, not scripted. Focus on uncovering needs, not pitching."
```

PROMPT 15: 90-Day Follow-Up Sequence (USE CHATGPT)

```
"Design a 90-day follow-up sequence for motivated seller leads who aren't ready yet:

Lead Type: [e.g., High equity absentee owners]
Initial Contact Method: [Letter, call, door knock]
Goal: Stay top-of-mind until they're ready to transact

Create a multi-channel sequence:
- Week 1: [touchpoint type and message]
- Week 3: [touchpoint type and message]
- Week 6: [touchpoint type and message]
- Week 9: [touchpoint type and message]
- Week 12: [touchpoint type and message]

Mix: postcards, emails, calls, valuable content. Each touchpoint should provide value,
not just 'checking in.'"
```

MY LIST STACKING ACTION PLAN

Multi-signal combinations I'll run in PropStream:

1. _____

2. _____

3. _____

Target neighborhoods/areas for motivated seller prospecting:

_____

_____

Current list quality (1-10): _____

Expected quality with the AI Multiplication System (1-10): _____

Current contact-to-contract rate: _____%

Target rate with multi-signal lists: _____% (aim for 3-4x improvement)

First AI-stacked list I'll run this week:

_____

_____

Weekly time dedicated to list stacking outreach: _____ hours

Pipeline tracking method:

_____

🎯 **Success Pattern: The 6-12 Month Relationship**

Don't expect immediate transactions from AI-stacked lists. The power is in identifying sellers 6-12 months BEFORE they're ready. Your goal: be the FIRST and ONLY agent they think of when motivation crystallizes. Build the relationship now, close the deal later.

YOUR 30/60/90-DAY IMPLEMENTATION TIMELINE

30-DAY QUICK WINS

Week 1: Foundation

- ☐ Sign up for AI triple stack (ChatGPT Plus + Claude Pro + Perplexity Pro)
- ☐ Test 5 prompts from this workbook with real content
- ☐ Choose ONE system to master first (Triple Stack, Content Multiplication, OR List Stacking)
- ☐ Document baseline metrics (current time spent, output quality, lead quality)

Week 2: First Deployment

- ☐ Deploy first complete workflow using chosen system
- ☐ Create content library folder (save all AI outputs for reuse/refinement)
- ☐ Test with 3 real projects (listings, market updates, or lists)
- ☐ Measure and document: hours saved, quality improvements, engagement rates

Week 3-4: Optimization

- ☐ Refine prompts based on actual results (save best performers)
- ☐ Build personal prompt library (minimum 10 proven prompts)
- ☐ Calculate 30-day ROI using the ROI Calculator section
- ☐ Share first success story in mastermind community
- ☐ Add second system to workflow

30-Day Target Outcome:

Save minimum 5 hours/week OR generate 1 additional qualified lead through the AI Multiplication System

60-DAY MOMENTUM

Week 5-6: Expansion

- ☐ Deploy second AI Multiplication workflow
- ☐ Create 30-day content calendar using multiplication system
- ☐ Run first multi-signal list in PropStream
- ☐ Train VA or team member on your proven workflows

Week 7-8: Integration

- [ ] Connect AI workflows to your CRM/business systems
- [ ] Document standard operating procedures (SOPs)
- [ ] Build case study from your results (before/after metrics)
- [ ] Calculate 60-day cumulative ROI

60-Day Target Outcome:

All three systems operational, 15+ hours/week saved, measurable increase in content output and lead quality

YOUR AI MULTIPLICATION ROI CALCULATOR

Time Savings Analysis

TASK	HRS/WEEK NOW	HRS/WEEK WITH AI	SAVINGS
Content creation (social media, blogs)	_____	_____	_____
Listing descriptions & marketing copy	_____	_____	_____
Market research & competitive analysis	_____	_____	_____
Lead list building & qualification	_____	_____	_____
Client communications & follow-up	_____	_____	_____
	_____	_____	

Financial Impact Calculator

Hours saved per week: _____ hours

Your hourly value: $_____ (conservative estimate: $150/hour for realtors)

Weekly value of time saved: $_____

Monthly savings: $_____ (weekly × 4.3)

Annual savings: $_____ (monthly × 12)

AI tool investment:

ChatGPT Plus: $20/month

Claude Pro: $20/month

Perplexity Pro: $20/month

Total: $60/month

NET MONTHLY ROI: $_____ (savings minus $60)
ROI MULTIPLE: _____ x (divide net ROI by $60)

Target: Minimum 10x ROI ($600+ monthly value from $60 investment)

Quality & Output Improvements

Content pieces per week BEFORE AI: _____

Content pieces per week WITH AI: _____

Output increase: _____%

Lead quality score (1-10) BEFORE AI: _____

Lead quality score (1-10) WITH the AI Multiplication System: _____

Social media engagement change: _____% (increase/decrease)

YOUR AI MULTIPLICATION COMMITMENT CONTRACT

The 10% who implement change everything. The 90% who don't stay exactly where they are. Which camp are you in?

I, _____, commit to the following:

BY END OF WEEK 1:

_____

_____

_____

BY END OF MONTH 1:

_____

_____

_____

BY END OF QUARTER (90 DAYS):

_____

_____

_____

MY SUCCESS METRIC:

I will know I've succeeded when:

_____

_____

_____

ACCOUNTABILITY PARTNER:

Name: _____

Phone/Email: _____

Check-in schedule: _____

(Recommended: Weekly 15-minute check-ins for first month)

My Signature: _____

Date: _____

> *"The difference between those who profit and those who get left behind is action, not knowledge. Your success with these tools is directly proportional to your commitment to implementation."*

LIVE SESSION NOTES

Demo #1: Triple Stack Routing

Key takeaways:

Prompts I want to use immediately:

Demo #2: Content Multiplication

Key takeaways:

First listing I'll multiply using this workflow:

Demo #3: List Stacking Intelligence

Key takeaways:

Multi-signal combinations to test:

Q&A Notes

Ideas From Other Members

RESOURCE LIBRARY & QUICK REFERENCE

AI Platform Links

PLATFORM	URL	COST
ChatGPT Plus	chat.openai.com	$20/month
Claude Pro	claude.ai	$20/month
Perplexity Pro	perplexity.ai	$20/month

Strategic Routing Quick Reference

USE PERPLEXITY FOR:

- Market research with current data
- Competitive analysis
- Neighborhood trends and statistics
- Property comparable research
- Any task requiring real-time web information with citations

USE CLAUDE FOR:

- Listing descriptions (long-form, sophisticated writing)
- Market reports and analysis
- Email sequences and client communications
- Strategic planning and complex reasoning
- Any task requiring nuanced writing and following complex instructions

USE CHATGPT FOR:

- Social media posts and creative variations
- Brainstorming and ideation
- Image generation (via DALL-E)
- Headline testing and A/B variations
- Any task requiring creativity and multiple alternatives

Recommended Next Steps

Want Us to Do It For You?

I've shown you exactly how to implement the AI Multiplication System yourself. But if you'd rather have it handled while you focus on client relationships:

- **Done-for-you content creation:** We multiply your listings across all platforms
- **AI-powered lead qualification:** We set up and manage your multi-model workflows
- **List stacking services:** We identify and research motivated sellers for you

Learn more: Bogen.ai | REIGNation.com

WEEKLY PROGRESS SCORECARD

Use this tracker to measure your implementation progress and ROI. Complete weekly for first 90 days.

WEEK OF: _____

Implementation Activities:

- ☐ Used Triple Stack workflow (which prompts?) _____
- ☐ Created content using multiplication system (how many platforms?) ____
- ☐ Ran AI-stacked list in PropStream (which signals?) _____
- ☐ Tested new prompt from workbook (which one?) _____
- ☐ Shared results in mastermind community

Time Tracking:

Hours saved this week: _____ (compared to manual methods)

Value of time saved (hours × hourly rate): $_____

Time invested learning/implementing: _____ hours

Net time savings: _____ hours

Output Metrics:

Content pieces created: _____

Social media posts published: _____

Motivated seller prospects identified: _____

Qualified leads generated: _____

Quality Assessment (1-10):

Content quality vs. manual creation: _____

Lead quality vs. traditional lists: _____

My confidence using the AI Multiplication System: _____

Results Achieved:

Solutions/Learnings:

Next Week's Focus:

FINAL SUCCESS CHECKLIST

Before You Leave Today:

- ☐ Identified my first AI Multiplication workflow to implement this week
- ☐ Copied at least 5 prompts into my notes/prompt library
- ☐ Calculated my potential ROI using the ROI Calculator
- ☐ Signed my Commitment Contract
- ☐ Set my accountability check-in date and partner
- ☐ Downloaded session recording link
- ☐ Joined Edmund's Mastermind community/Slack

This Week (Days 1-7):

- ☐ Sign up for AI triple stack if not already done (ChatGPT + Claude + Perplexity)
- ☐ Test first Triple Stack workflow with real listing or market update
- ☐ Create one piece of content using 15-minute multiplication system
- ☐ Run first multi-signal list in PropStream (or schedule time to do it)
- ☐ Document baseline metrics (time spent, current output)
- ☐ Share one win or learning in mastermind community
- ☐ Schedule Week 1 accountability check-in

Month 1 (Days 1-30):

- ☐ Master one complete system (choose Triple Stack, Content Multiplication, OR List Stacking)
- ☐ Build personal prompt library (minimum 10 proven prompts)
- ☐ Measure and document ROI using calculator
- ☐ Add second system to workflow
- ☐ Share case study/results with mastermind

YOUR SUCCESS METRIC:

By **[INSERT DATE 30 DAYS FROM NOW]**, I will have:

_____

_____

_____

"While my competitors debate which AI to use, I'm stacking three and multiplying my output. These tools don't make me lazy— they make me unstoppable."
